

Greenness & surface temperature

25 June 2026 • Landsat 8 • A single-date spatial comparison

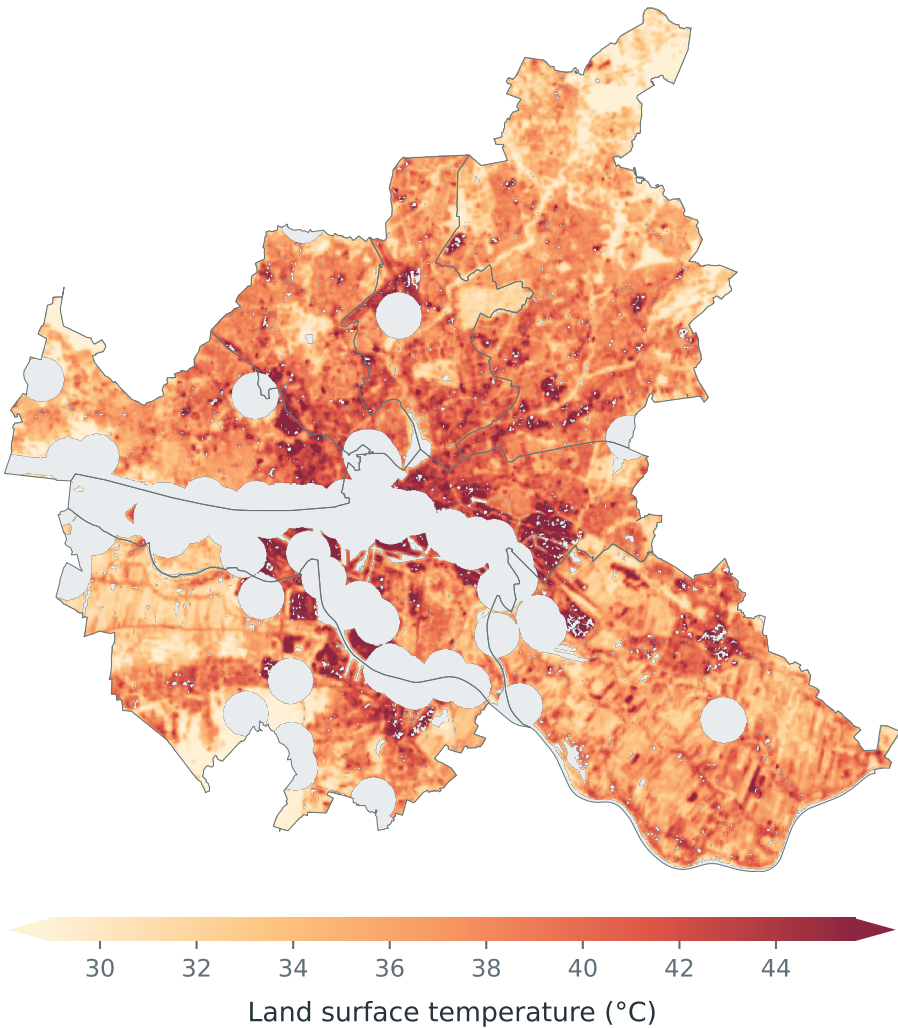

01 VEGETATION GREENNESS

Dark green indicates higher NDVI

02 SURFACE TEMPERATURE

Dark red indicates warmer surfaces

COMMON PIXEL COVERAGE 78.75% | **Grey areas: excluded pixels, including water**

Same pixel mask on both maps; cloud distance ≥ 1 km. Neuwerk excluded. Surface temperature is not air temperature.

Temperature colours span the 2nd-98th percentiles; values outside this range remain in the data.
